The Key Maps which are attached as Schedule “A” to this By-law identify the “Flood and Fill Constraint Areas” which represents the approximate location of the boundaries of the “Generic Regulations”, under Ontario Regulation 97/04, specifically Ontario Regulations 150/06, 157/06, and 164/06. The inclusion of the Regulated Flood Area on the Key Maps is for information purposes only and the applicable Conservation Authority should be contacted to determine how the “Generic Regulations” impact development proposals.

4.3 Use of Zone Classifications and Zone Symbols

The zone classifications and symbols identified in Section 4.1 above shall be used when referring to land, buildings, and structures, and the uses thereof permitted by this By-law in said zones. Where the various zone symbols are shown on the Key Maps or Schedule “A”, such reference is intended to indicate that the lands on which the zone symbol is placed are located within the corresponding zones as established by Section 4.1 above and shall be subject to the applicable zone provisions as set forth in this By-law for that respective zone.

Where a zone symbol applying to certain lands as shown on the Key Maps attached to this By-law on Schedule “A” is followed by a dash and a number (e.g. A-1), such dash and number are intended to indicate that such land is the subject of one or more special zone provisions. The special zone provisions can be determined by referring to “special provisions” section for the applicable zone as set forth in this By-law. Lands zoned in this manner will be subject to all other provisions for the respective zone except as otherwise provided for by the special provisions.

4.4 Interpretation of Zone Boundaries

The zone symbols as shown on the Key Maps of Schedule “A” to this By-law are bounded by thick black lines, the purpose of which lines is to indicate the extent of the zones. The following “rules of interpretation” are to be applied when determining the location of zone boundaries on the Key Maps, of Schedule “A” of this By-law, and kept in the Office of the Zoning Administrator:

- 4.4.1 Where any zone boundary is shown on Schedule “A” as following the boundary of a street, watercourse, or railway right-of-way, the zone boundary shall be considered to follow the centre line of such street, watercourse, or railway right-of-way;
- 4.4.2 Except as provided for in Section 4.4.1 above, where a zone boundary is shown on Schedule “A” as approximately following the boundary of a lot that is shown on a registered plan or a registered reference plan, the zone boundary shall be considered to be such lot boundary as shown on said registered plan or registered reference plan;
- 4.4.3 Where a zone boundary is shown on Schedule “A” as being parallel to, or approximately parallel to, a street and the distance from the street is not indicated, the zone boundary shall be considered as being parallel to such street and its distance from the street shall be determined by using the scale shown on the Schedule “A” Key Map to scale or measure the distance; and
- 4.4.4 Where any zone boundary is left uncertain after the application on the provisions of Sections 4.4.1, 4.4.2, and 4.4.3 of this By-law, the location of the zone boundary shall be determined by using the scale shown on the Schedule “A” Key Map to scale or measure the applicable distances.

4.5 Interpretation of Certain Words

- 4.5.1 In this By-law, the word “shall” is considered to mean mandatory.
- 4.5.2 In this By-law, words used in the present tense include the future tense and vice-versa.

There are two types of accessible parking spaces, each of which have a minimum length of 5.5 m and a maximum slope of 1:50:

Type A 3.4 m wide with signage identifying the space as “van accessible”. Type B 2.7 m wide.

The following table describes how the minimum number of accessible spaces is to be calculated. Please note that calculated figures for the total number of required accessible spaces are to be rounded up to the nearest whole number, and that the requirements do not apply to residential buildings with fewer than five dwelling units and townhouse dwellings.

Total Parking Spaces Provided	Total Required Accessible Spaces
25 or fewer	1
26 – 50	2
51 – 75	3
76 – 100	4
101 – 200	1 + 3% of Total Spaces
201 – 1000	2 + 2% of Total Spaces
More than 1000	11 + 1% of Total Spaces

In circumstances where only one accessible space is required, that space must be provided as a Type A space. For all other circumstances, the minimum required number of Type A spaces is 50% of the total accessible space requirement, rounded down to the nearest whole number. All other required accessible parking spaces may be provided as either Type A or Type B.

Each accessible parking space provided must be adjacent to a pedestrian access aisle, although one aisle may be shared by two spaces. Pedestrian access aisles must:
