Re: Proposed Reconstruction of Elma Street West

Dear Resident:

The Municipality of North Perth has contracted GM BluePlan Engineering of Listowel to undertake the design for the future reconstruction of Elma Street West from Wallace Avenue South to Victoria Avenue South. This work is tentatively scheduled for summer of 2023, pending North Perth budget considerations.

GM BluePlan staff undertook various preliminary design activities in 2022 including a topographic survey, photos of existing conditions, and an investigation of the Elma Street bridge. It is expected that the proposed reconstruction will involve replacement of all underground infrastructure (storm sewers, sanitary sewers, watermains) including all sewer & water services to property line, reconstruction of the roadway with curb and gutter, replacement of sidewalks, and a structural rehabilitation of the bridge.

At this time, we welcome any comments or feedback from residents and businesses on the proposed project. Additionally, there is a planned Public Information Centre (PIC) to be held at the North Perth Municipal Office from 5pm to 7pm on Thursday, February 16th. We welcome your attendance at the PIC to discuss this project. For up-to-date information on this and any other planned and on-going construction projects in North Perth, please reference: <https://www.northperth.ca/en/our-community/construction-projects.aspx>
