Enbridge Gas Ontario teams up with North Perth Fire Department to Reduce Fire and Carbon Monoxide Deaths through Safe Community Project Zero

Municipality of North Perth, ON, October 30, 2025 – Today, Enbridge Gas Ontario (Enbridge Gas), the Fire Marshal's Public Fire Safety Council (FMPFSC) and the North Perth Fire Department announced they are working together to improve home safety and bring fire and carbon monoxide-related deaths down to zero.

The North Perth Fire Department received 192 combination smoke and carbon monoxide alarms through Safe Community Project Zero—a public education campaign that will provide more than 14,200 alarms to residents in 75 communities across Ontario.

This year, Enbridge Gas invested \$450,000 in Safe Community Project Zero, and over the past 17 years, the program has provided more than 115,000 alarms to Ontario fire departments.

When properly installed and maintained, combination smoke and carbon monoxide alarms help provide the early warning to safely escape from a house fire or carbon monoxide exposure. Carbon monoxide is a toxic, odourless gas that is a by-product of incomplete combustion of many types of common fuels.

“Carbon monoxide alarms play a vital role as a second line of defence against this invisible threat, often called ‘the silent killer’,” says Desirée Swance, Advisor, Municipal & Stakeholder Engagement, Enbridge Gas. “Proper maintenance of fuel-burning appliances is the most effective way to prevent carbon monoxide exposure. We’re proud to support our communities by raising awareness and helping Ontarians take simple, proactive steps to stay safe in their homes.”

“Each day, fire departments focus their efforts on educating the public about the importance of having working smoke and carbon monoxide alarms in their home. The objective of Safe Community Project Zero, is to deliver these alarms to areas where they are needed most, says Jon Pegg, Ontario Fire Marshal and Chair of the FMPFSC. “It is a program that not only helps fire departments raise awareness about the legal requirement to have working smoke and carbon monoxide alarms installed in all Ontario homes but also reinforces the critical role they play in saving lives.”

“Working alarms save lives and thanks to this generous donation of combination smoke and carbon monoxide alarms from Enbridge Gas, the North Perth Fire Department can continue its vital door-to door campaign to ensure homes are protected,” says Manager of

Development & Protective Services/Fire Chief Janny Pape. “We’re deeply grateful for this partnership aimed at keeping our community safe.”

About the North Perth Fire Department

The North Perth Fire Department is a volunteer fire department operating from fire stations in Listowel, Atwood and Monkton, Ontario. As a department, we dedicate our efforts to protecting the safety and welfare of our residents and the public through preservation of life, property and environment through the provision of public fire safety education, fire safety inspections and enforcement, and emergency response.

About the FMPFSC

The FMPFSC was established in 1993 with a mission to help create “a world where no one is hurt by fire.” Chaired by the Ontario Fire Marshal, the FMPFSC promotes fire prevention and public education through sponsorships and partnerships with various groups and individuals with an interest in public safety. Follow the FMPFSC on X @FMPFSC.

About Enbridge Gas

Enbridge Gas Ontario is Canada’s largest natural gas storage, transmission and distribution company, with 2023 marking its 175th anniversary of serving customers. The distribution business provides safe, affordable, reliable energy to about 3.9 million customers and is innovating to contribute to a lower-carbon energy future. The storage and transmission business offers a variety of storage and transportation services to customers at the Dawn Hub, the largest integrated underground storage facility in Canada and one of the largest in North America. Enbridge Gas Ontario is owned by Enbridge (ENB), a Canadian-based leader in energy transportation and distribution. Visit enbridgegas.com to learn more.
